

# Foam Corner Guards

## INSTALLATION INSTRUCTIONS:

(Kindly read through before starting)

1. Ensure children are being supervised by an informed caregiver whilst you install.
2. Before installing: Ensure you and your family are happy with the placement (repositioning it later will cause the adhesion to weaken.)
3. Safety Tip: Can also be installed upside down for corners on higher tables, where the sharp corner is facing down.
4. Clean areas with alcohol swabs provided, ensuring the area is completely dry before you apply the product.
5. Clean the inside of the corners with alcohol swabs aswell.
6. Remove film from double sided tape.
7. Place the corner guard on the corner and position into place.
8. For a more permanent application, use Soudal Fix All Crystal Flexible Adhesive Sealant Tube Super Clear, and glue them down.
9. Allow 12 hours for adhesion to set properly.
10. Clean up afterwards, discarding of any packaging.

## For a more permanent application:

- Use Soudal Fix All Crystal Flexible Adhesive Sealant Tube Super Clear - available at your local hardware or on [www.securadeal.co.za](http://www.securadeal.co.za)
